AUTOMATION

Effective tool control requires that your teams have access to just the tools they need, when and where they need them. Proprietary software manages access at the individual user level, allowing either stand-alone or networked control.

KEEP YOUR TOOLS SECURE, ORGANIZED AND IN THE HANDS OF THE TECHNICIANS THAT NEED THEM.

Snap-on helps you control lost tool downtime and replacement costs with access control systems. In critical industries and applications, tool control is an essential step toward eliminating FOD (Foreign Object Damage in aviation) and implementing FME (Foreign Material Exclusion in the power industry). Unlocked and open access tool boxes can result in FOD/FME problems. Snap-on puts you in control.

CUSTOMER BENEFIT

- Standardize Work
- Improve Productivity
- Control Inventory
- Reduce Losses
- Control FOD
- Improve Security
- Audit Trail
- Improve Accountability
- Oversight Prevention
